

Service Overview

LogRhythm Co-Pilot Services are ideal for organizations that may be short-staffed, not yet platform experts, or expect rapid ROI from their security investment.

These services are designed to help you get the maximum value out of your LogRhythm platform.

LogRhythm Co-Pilot Services:

- ▶ Admin Co-Pilot for platform health
- ▶ Analytics Co-Pilot for threat detection
- ▶ Content Co-Pilot for content customization

Content Co-Pilot Service

Facing an expanding threat landscape, finding time to perform small yet important tasks can be difficult for a short-staffed security team. To help fill the resource gap, LogRhythm's Content Co-Pilot service augments your team. This service pairs you with a Co-Pilot Consultant to expedite small content-creation projects you might not otherwise have time to prioritize. From help creating new content and enabling advanced features to customizing your platform, your Co-Pilot Consultant can help you make the most of your LogRhythm deployment - and maximize your team's efficiency.

How the Content Co-Pilot Service Works

The Content Co-Pilot Service can augment both your analysts and administrators by assisting with several types of small, short-term projects.

Boost your security analysts' capacity for protecting your organization from harmful threats by employing Content Co-Pilot to undertake your security team's more menial and time-consuming tasks. Co-Pilot Consultants can help accelerate threat detection and response by creating custom AI Engine rules, activating SmartResponse™ plugins, and adjusting dashboard layouts for optimal functionality and analysis.

To augment your administrator staff, Consultants can assist with advanced log source onboarding, build

Available Content Co-Pilot Service Projects

- Reports and Report Templates
- Dashboard and Analyze Layouts
- Custom AI Engine Rules
- SmartResponse™ Plugins
- Data Masking Rules
- Virtual Log Source Templates
- File Integrity Monitoring and Registry Integrity Monitoring Policies
- Advanced Log Source Onboarding

report and virtual log source templates, and expedite urgent reporting needs.

To ensure you gain the most value from your Content Co-Pilot service, your Consultant will work with you to understand your needs and help establish your project objectives. Projects are defined as lasting two hours or less and no more than two projects can be in progress at once. Additionally, the service does not cover Message Processor Engine (MPE) development, custom device support, platform upgrades, or long-term projects.

Benefits of Content Co-Pilot Service

Get the most out of your LogRhythm platform by customizing content to best suit your security needs

Improve your team's efficiency by minimizing their time spent on small content projects
