

Challenges

- The Network is the warfighter - whether at 10 or 10,000 miles
- It's a **Rapidly Evolving Threat Landscape** and the bad guys are getting more sophisticated
- It's a matter of **WHEN** you will be breached, **not IF**
- Most are unable to detect abnormal activity because they don't know what "normal" activity is
- You don't know what you can't see
- The burden associated with demonstrating that you're compliant is overwhelming
- It's difficult to balance **efficiency** and **effectiveness** in uncertain times
- There is **NO** silver bullet

Goals

- It's all about the data - **protect it!**
- Meet operational needs in a dynamic threat environment
- JIE and staying ahead of our adversaries
- Deploy automated technology to learn behavioral attributes across multiple dimensions/Behavioral whitelisting
- Cloud first approach
- Provide greater visibility to advanced threats and breaches faster is critical
- Remain ahead of adversaries
- Build, Operate, Defend, Exploit, Attack
- Become more efficient in a fiscally constrained environment
- Benefit from ease of use, flexible deployment, simplified management

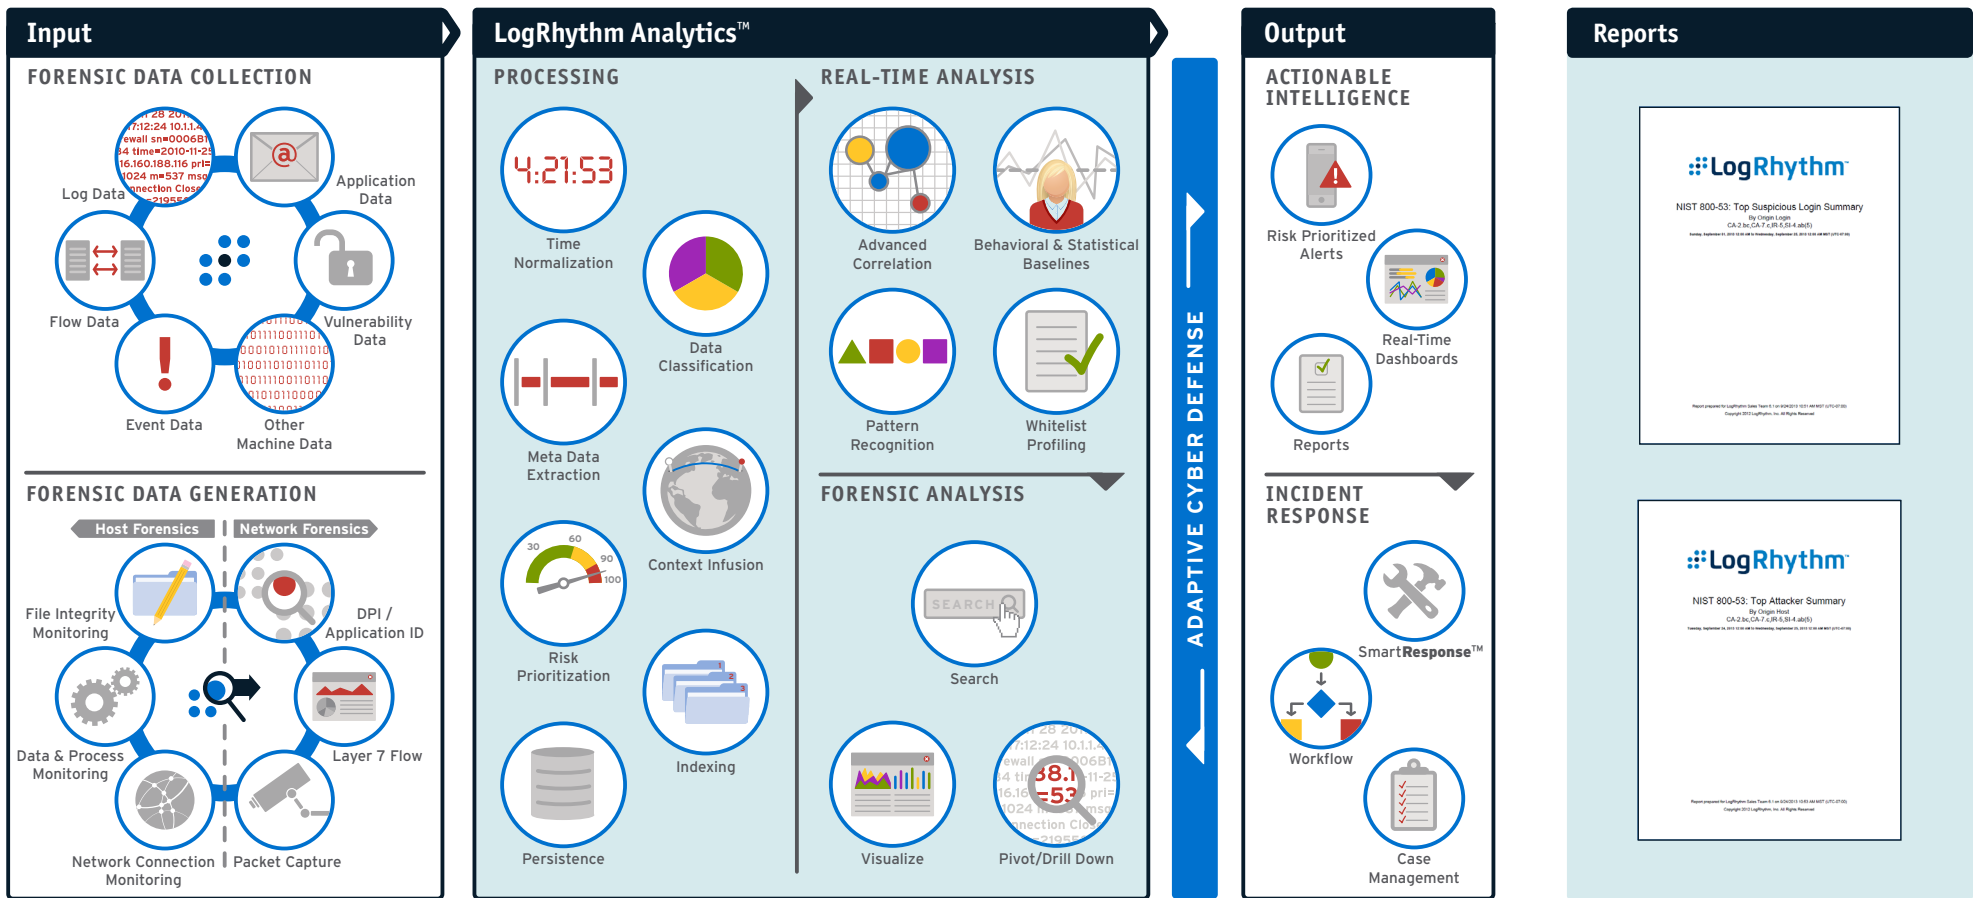

Key Capabilities

Detect and defend against advanced cyber threats with LogRhythm Security Analytics

- Large data set analysis via visual analytics, pivot, and drill down
- Purpose built Advanced Persistent Threat application using leading-edge, focused monitoring and integrated forensics
- Real-time Big Data security analytics with continuous event monitoring, alerting and automated remediation actions
- Automated, out-of-the-box alerting and report generation aligned to DIACAP, FISMA, NIST, NERC, HIPAA, and other standards and formats
- Designed to securely collect and process ALL log types and integrate with existing cybersecurity toolsets

Federal Clients

ADAPTIVE CYBER DEFENSE

GSA Schedule # GS35F0311R

Common Criteria (VID# 10389)
 FIPS 140-2 (FIPS# 1817)
 Certificate of Networkiness (Enterprise CoN 201416842)
 DADMS (#91947)
