

Cyber breaches cost UK businesses £34.1 billion in 2015¹

Can you afford not to be prepared?

£34.1 BILLION

Security breaches are on the rise...

90% of large organisations experienced a breach last year².

59% of businesses expect there to be more security incidents in the next year than last².

Breaches are getting more expensive

The minimum cost of a security breach for large organisations has increased by over **£850,000** in the past year².

Attacks are indiscriminate

75% of attacks are opportunistic³.
If they can get in, they will.

To tackle today's threat landscape you need

Total VISIBILITY

It's not what you know, it's what you don't know. You can't protect your business from something you can't see. Visibility is your first line of defense.

54% of breaches go undetected for over 6 months⁴.

Can you be sure your business hasn't been breached right now?
Find the threats before they do damage.

Smart DETECTION

The ability to see threats is one thing, but constant vigilance is another. You need an automated framework that can not only detect threats quickly, but understand them and the level of risk they pose

72% of companies where the security policy was misunderstood had staff related breaches².

Seeing is one thing, knowing how and when to act is another.

Accelerated RESPONSE

Automatically being able to detect threats is critical, but the fate of your business will be determined by how quickly you're able to take action.

In 60% of cases, attackers compromise an organisation within minutes³.

Using **LogRhythm's Security Intelligence Maturity Model** you can discover how prepared your business is for today's threat landscape.

What level are you?
